

Govee

Making Life Smarter

# ABOUT GOVEE

Govee has been committed to making life smarter since 2017.

As one of the top 5 fastest growing electronics brands in North America, we've always aimed to provide personalized and meaningful innovations for the smart home with our large range of smart lights and home appliances.

We admire those who strive to create amazing spaces, and believe in the power of working together to create a more brilliant life. It's these goals that light our continuous drive towards an expanded ecosystem and a commitment to better experiences for all.

## **CogniGlow**

CogniGlow™ is an AI intelligent algorithm developed by Govee. It has an industry-leading AI information recognition function and introduces deep learning into the ambient lighting industry. The algorithm aims to provide users with a more intelligent and immersive next-level experience.

## **DreamView**

DreamView is a smart technology based on Govee's IoT system. It uses light mapping to reflect the information of the screen or music in the same environment via a Bluetooth connection. It's aimed to provide users with a combination of smart, rich, and cool lighting effects so they can enjoy diverse entertainment to its maximum potential.

## **RGBIC**

RGBIC, the latest light displaying technology of Govee, features advanced IC (Independent Control) chips that make multiple colors show on one strip light simultaneously. See vivid colors constantly chasing or flowing like a rainbow. Say goodbye to boring RGB solid-colored lighting.

## **Envisual**

An innovative zone-division color-match method calibrates and captures to deliver color-matching accuracy for you.

**Govee TV Backlight 3S (55~65 inch)  
NETFLIX CO-BRANDING-H6098SD1**
